

DEEPAK YADAV

Bitrix24 Support Engineer | Full Stack Web Developer

Gurugram, Haryana 122506 | +91 8307928412 | dk4796804@gmail.com | [GitHub](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Bitrix24 specialist experienced in designing, implementing, and customizing CRM solutions end-to-end — from workflow automation, robots, and triggers to REST API and webhook integrations with third-party CRM, ERP, and communication tools (WhatsApp/ChatApp, Meta, SMTP). Comfortable debugging system issues and data inconsistencies, managing data import/export, synchronization, and migration, and configuring role-based access control to protect data integrity and system reliability. Builds dashboards and reporting views within Bitrix24 to give business teams clear visibility into pipelines and performance. Backed by a full stack development foundation (React.js, Next.js, PHP, Python/Django) for delivering scalable, business-aligned digital solutions, and a track record of translating requirements into automated workflows and training client teams for independent CRM operation.

WORK EXPERIENCE

Web Developer

Nov 2024 – Present

Starmoon Technology Consultant Pvt. Ltd. | Gurugram, India

- Designed, implemented, and customized Bitrix24 CRM solutions end-to-end, including custom CRM forms, lead/deal pipelines, and user permission structures, to streamline client sales and support workflows.
- Developed and managed Bitrix24 REST API integrations with third-party CRM, ERP, and communication tools — WhatsApp (ChatApp), Meta (Facebook/Instagram), and SMTP — to automate lead capture and multi-channel client communication.
- Configured and optimized workflows, automation rules, robots, and triggers to reduce manual follow-up and improve process reliability across CRM pipelines.
- Debugged and resolved CRM system issues, workflow errors, and data inconsistencies, working with clients to maintain reliable, uninterrupted operations.
- Handled data import/export, synchronization, and migration during client onboarding and system transitions, ensuring accuracy and integrity across large data sets.
- Configured role-based user permissions and access controls to safeguard CRM data and support system security and reliability.
- Customized Bitrix24 Sites and Online Store with tailored dashboards, lead-tracking widgets, and catalog configurations, giving business teams clearer visibility into performance.
- Collaborated with designers, project managers, and client stakeholders to translate business requirements into scalable CRM and automation solutions, and delivered hands-on CRM training to client teams.
- Built responsive, cross-browser web interfaces using React.js, Qwik.js, HTML/CSS, Bootstrap, and Tailwind CSS, and developed backend features with PHP and Python (Django).
- Managed and customized WordPress (Houzez) and Laravel (Homzen) real estate websites to client specifications, ensuring SEO readiness, mobile responsiveness, and optimized performance.

BITRIX24 CRM IMPLEMENTATIONS

- Designed and deployed end-to-end CRM setups covering lead/deal management, custom sales pipelines, custom CRM forms, and stage-based automation to reduce manual work.
- Configured CRM Automation Rules, Robots, and Triggers, and optimized workflows to streamline business processes and improve reliability.
- Built and maintained REST API and webhook integrations to synchronize data pipelines between Bitrix24 and external CRM/ERP systems in real time.
- Managed bulk data import/export and migration during client onboarding and system transitions, resolving data inconsistencies and ensuring accuracy.
- Set up role-based user permissions and access controls, and monitored system performance to support data security and reliability.
- Customized Bitrix24 Sites and Online Store modules for catalog display, dashboards, lead tracking, and storefront branding.
- Delivered hands-on CRM training and documentation to client teams, ensuring smooth adoption and independent operation post-implementation.
